

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ANNUAL REPORT OF THE

U. S. **Supervising Architect of the
Treasury Department**

FOR THE FISCAL YEAR ENDED JUNE 30

1907

WASHINGTON
GOVERNMENT PRINTING OFFICE

1907

TREASURY DEPARTMENT,
Document No. 2484.
Supervising Architect.

REPORT OF THE SUPERVISING ARCHITECT OF THE TREASURY.

WASHINGTON, D. C., *June 30, 1907.*

SIR: At the close of the fiscal year I have the honor to present the following report, the tenth submitted by me, showing the transactions of this office during the past year.

The statements appearing as part of this report show existing legislation and expenditures made during the last fiscal year for the purchase of sites, repairs and improvements specially appropriated for, the construction of new buildings, and general repairs to occupied buildings under the control of the Treasury Department.

The session of Congress which adjourned June 30, 1906, enacted a large volume of legislation in reference to public buildings. It provided for the acquisition of 86 sites, without making appropriation for the erection of buildings thereon; authorized and appropriated for extensions and improvements to 45 buildings; provided for the purchase of sites and the erection of 123 buildings, and likewise for extensions, improvements, and new buildings on 41 sites already owned.

During the fiscal year which closed June 30, 1906, it became necessary to curtail the technical force of this office, because of inadequacy of appropriation, and much time has elapsed in perfecting a new organization fully qualified with the proper architectural knowledge to carry into effect the legislation relating to public buildings, but notwithstanding this condition fair progress has been made, sites have been selected as rapidly as consistent with law and requirements, sketch plans and estimates prepared and approved, as required by law, and invitations issued for proposals for work, and contracts made upon receipt of suitable bids.

By reason of the present activity in all branches of the building trades, the unsettled condition of the labor market, and the uncertainty as to what the money situation will or may develop into during the coming year, it has been shown from the work already placed on the market for estimates that the cost of construction is at the present time very much in excess of what it ever has been in the past and in many instances in excess of the limits placed on the work by Congress.

To meet this condition has entailed largely increased work on this office in revising and cutting down work, that being the only alternative except recommending legislation increasing the limits of cost, a line of procedure that is looked on with little favor either by this office or the Department. However, this procedure will of necessity have to be followed in some instances, and where it is not, the buildings to some extent will be inadequate for the growing needs of the public service.

Therefore it is recommended that if consistent with the policy of the Department, letters from the Department be written to both the President of the Senate and the Speaker of the House of Representatives calling attention to the conditions and asking that some steps be taken to ameliorate the same.

During the past fiscal year 36 new buildings and 4 extensions to old buildings were completed and occupied, and during the same period 8 new buildings were commenced, which, with 19 under contract and not completed, make 27 in course of construction.

The following table classifies the number of buildings under various conditions, exclusive of marine hospitals and quarantine stations, expenditures made, and shows the operations of this office during the year ending June 30, 1907:

BURLINGTON, VT., POST-OFFICE AND CUSTOM-HOUSE.

Work nearing completion.

STATEMENT OF APPROPRIATIONS.

Act of June 6, 1902, authorizes the erection upon the present site of a suitable fireproof building, and limits cost of such building, including fireproof vaults, heating and ventilating apparatus, and approaches, complete, to \$170,000, and, in order to provide a suitable location for said building, directs that the present post-office and custom-house building shall be removed to some other location on said site, and shall continue to be used and occupied for its present purposes until the completion of the new building hereinafter authorized. (32 Stat., 325, pt. 1.)

This act provides that from the appropriation hereafter made for the new building, not exceeding \$10,000 may be used for the removal, repair, and renovation of the present post-office and custom-house building, to make the same suitable for occupancy pending the erection of such new building. (32 Stat., 325, pt. 1.)

This act also provides for the sale of the present building, upon the completion and occupancy of the new building, and authorizes the deposit of the proceeds thereof in the Treasury as a miscellaneous receipt. (32 Stat., 325, pt. 1.)

NEW YORK, N. Y., CUSTOM-HOUSE (NEW).

Work under the various contracts for erection of building, including interior finish, mechanical equipment, etc., progressing. Building being erected under the terms of the Tarsney Act.

STATEMENT OF APPROPRIATIONS.

Act of September 14, 1888, provides for the acquisition of a site for an appraiser's warehouse, and for the erection thereon of a suitable building, limiting the cost of site to \$850,000, and of building, including heating apparatus, approaches, etc., to \$650,000, which amounts are appropriated for said purposes. (25 Stat., 479.)

This act further provides for the acquisition, in the discretion of the Secretary of the Treasury, in lieu of a site for an appraiser's warehouse only, of a site sufficient to accommodate both an appraiser's warehouse and a new custom-house building, or of two separate sites, in the vicinity of each other, for said buildings, and limits the cost thereof to, and appropriates therefor (in lieu of the \$850,000 hereinbefore provided) the sum of \$2,000,000. (25 Stat., 480.)

Of the \$2,000,000 above appropriated, \$505,022-48 was expended for purchase, of site for appraiser's warehouse, leaving a balance, available toward acquisition of site for custom-house, of..... \$1, 494, 977. 52

Act of June 28, 1890, amends act of September 14, 1888, by striking out the words "in the vicinity of each other" where the same occur, so that the appraisers' warehouse may be located at any point within the collection district, north of Liberty street, on the west side of the city of New York. (26 Stat., 183.)

Act of March 3, 1891, authorizes the erection of a new custom-house on the site selected and designated therefor under the terms of an act entitled "An act for the erection of an appraiser's warehouse in the city of New York, and for other purposes," approved September 14, 1888, at a cost not to exceed the amount which shall be derived under section 2 of this act, in addition to any sum or sums which may be available under the provisions of the former act. (26 Stat., 850.)

This act (section 2) authorizes the sale, after due advertisement, for a sum not less than \$4,000,000, of the present custom-house property in the city of New York, bounded by Wall, Williams, and Hanover streets, and Exchange place, and appropriates for the construction of the new custom-house building the proceeds of such sale after payment of the usual incidental expenses and commissions. It further provides for the leasing of said premises from the purchasers thereof, until the new custom-house is ready for occupancy, at a rental not to exceed 4 per cent per annum on the purchase price; authorizes the receipt of the purchase price in several payments, from time to time, as may be deemed most advantageous; and provides that the use, occupation, and possession of said property shall not be surrendered until the new custom-house is ready for occupation and the final payment made. (26 Stat., 850.)

This act further authorizes the appointment of five citizens of the State of New York, who shall be designated as United States building commissioners, and who shall be charged with the erection and construction of the new custom-house building, under the direction of the Secretary of the Treasury. (26 Stat., 851.)

Act of March 3, 1893, repeals section 3 of the foregoing act, which provides for the appointment of a building commission. (27 Stat., 573.)

Act of March 2, 1899, authorizes the acquisition, for customs purposes, of the premises heretofore selected under the act of September 14, 1888, as a site for a custom-house building, known as the Bowling Green site, and appropriates therefor, in addition to the balance in the Treasury remaining unexpended under the provisions of the act of September 14, 1888 (i. e., \$1,494,977.52), the sum of (30 Stat., 969) -----

\$750,000. 00

This act, upon the acquisition of said site, authorizes contracts within the limit of cost prescribed by law, subject to appropriations which may hereafter be made by Congress, for the erection and completion thereon of a fireproof building for the purposes of a custom-house, limiting the cost thereof, including heating and ventilating apparatus, fireproof vaults, elevators, and approaches, complete, but exclusive of site, to \$3,000,000, and appropriates for preparation of plans and commencement of work (30 Stat., 969) -----

1, 000, 000. 00

This act further provides that the Secretary of the Treasury may, in his discretion, invite not less than five architects to compete for the preparation and furnishing of plans, drawings, and specifications, and for the local supervision of the construction of said new custom-house building, under the direction and general supervision of the Secretary of the Treasury (30 Stat., 969.)

This act further authorizes the sale, to the highest bidder, after due advertisement, for not less than \$3,000,000, of the present custom-house property in the city of New York, bounded by Wall, Williams, and Hanover streets and Exchange place, and provides for the deposit of the proceeds of the sale, after payment of the usual incidental expenses, in the United States Treasury as miscellaneous receipts derived from the sale of Government property; and in case of such sale, the leasing of said premises from the purchaser or purchasers thereof is directed, at a rental not to exceed 4 per cent of the purchase price per annum, for use as a custom-house until the new custom-house is ready for occupancy, upon such terms as may be deemed advantageous, said sale to be subject to such right of lease; and authority is given to receive said purchase price in several payments, from time to time, as may be deemed most advantageous; and provision is made that the use, occupation, and possession of said property shall not be surrendered until the new custom-house is ready for occupancy and final payment made. (30 Stat., 969.)

This act provides, further, that the appropriation of \$750,000 made therein, in addition to the balance in the Treasury remaining unexpended under the provisions of the act of September 14, 1888, for the Bowling Green site, and the \$1,000,000 hereinbefore provided for the preparation of plans and commencement of work of construction, shall be reimbursed out of the proceeds of the sale of the present custom-house property when such proceeds have

been covered into the Treasury; and all acts and parts of acts inconsistent with the provisions of this act are repealed. (30 Stat., 970.)
